Infrared-Thermometer 31.1133.01 for temperature measurement on the forehead
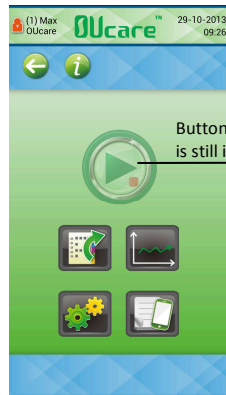

GB

Quick Guide

1. Download the app OUcare (IRT OUcare) from the Apple App Store for your iPhone or from the Google Play store for your Android smartphone or open the already downloaded app.

Launch the app IRT OUcare

.

Button is still inactive

2. Place the O/S switch in the correct position of the operating system of your smartphone (switch position 1 for Android, 2 Apple iOS for).

iOS
Android
Protective cap
Schutzkappe

3. Plug the device into the earphone jack of your smartphone and remove the protective cap.

Button becomes active

Turn it to a suitable position for your measurement.

4. Direct the sensor to the forehead. Keep a distance of 1 to 3 cm to the forehead! The measuring time is approximately 1 second. Make sure that the distance to the forehead is not changed during the measurement.

1-3cm

5. The last user (1-9) will appear in the top left corner. To start the measurement press the round button on the screen.
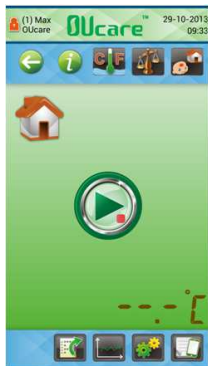

With activated voice output you will hear the measured temperature. The unit is now ready for another test. (Display L/H: temperature is out of range)

Temperature measurement of an object or surface

By touching the button

you change the mode to the measure of the temperature of an object or surface.

The procedure is the same as for the measurement on the forehead. But there is no voice output.
