

## 50.1002.01 SAMBA

### Body analysis scale

A healthy body requires not only a healthy weight but also requires a healthy balance of BMI (body mass index) and Body Fat (the ration between muscle and fat mass). Help monitor and improve your health and reduce the risk for cardiovascular disease.

#### Promote health and fitness

With the **body analysis scale SAMBA**, you can monitor your personal values for weight, body fat percentage, body water, muscle and bone mass. Plan and monitor **improvements in your health** with diet and exercise.

#### For the whole family

The body analysis scale SAMBA turns on automatically when you stand on the scale. The sensors detect automatically the person. The scale stores the measured values for up to 8 people.

- **Measurement of body weight, body fat, body water, muscle and bone mass using bioelectrical impedance analysis**
- **Automatic detection and storage for up to 8 different people**
- **Auto on-off function**
- **Made off tempered safety glass**
- **Modern flat design**

#### Technical data:

- Measuring range weight: 5 to 180kg (11 to 396 lbs)
- Weight in kg, lb (pound) or st (Stone)
- Background illumination
- Dimensions: 320 x 330 x 28mm
- Weigth: 1712g
- Includes batteries (4 x 1,5V AAA)
